

How to sort waste

RESIDUAL WASTE

Food waste, paper, cardboard and plastic shall be separated from other waste. All other waste is known as residual waste. Residual waste can be recycled to energy.

Remember that FjellVAR sells extra waste bags if you do not have room in the waste container for all your residual waste.

FOOD WASTE

The container for food waste can only be used for food that can be used as compost. Food waste is recycled to create bio-gas and bio-fertiliser.

If you need more bags for food waste, tie an empty bag to the container.

CARDBOARD AND PAPER

The container for paper must only be used for paper, cardboard and cardboard boxes. Paper waste is simple to recycle into new paper.

PLASTIC WASTE

Put plastic waste into the bag for plastic waste and tie it to the container for paper waste.
